

How to compile the source SimpleAudioFilter08.

Test done with: **Arduino ide 2.3.0** and **earlephilhower/arduino-pico plugin v. 3.7.0**

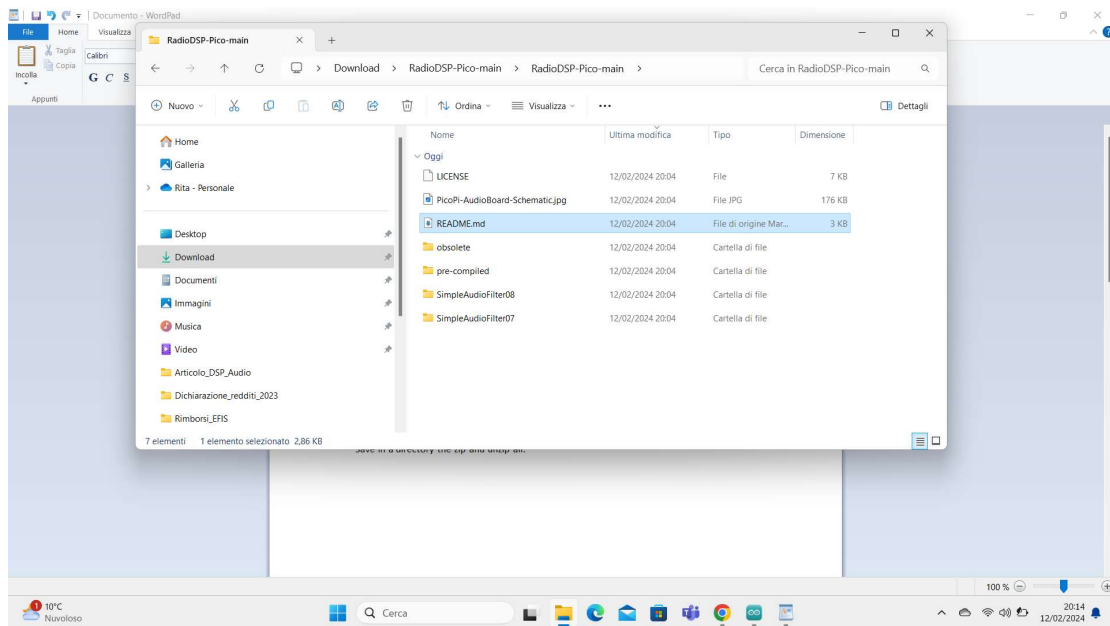

Date: 12 Feb. 2024

Download the latest sources from github:

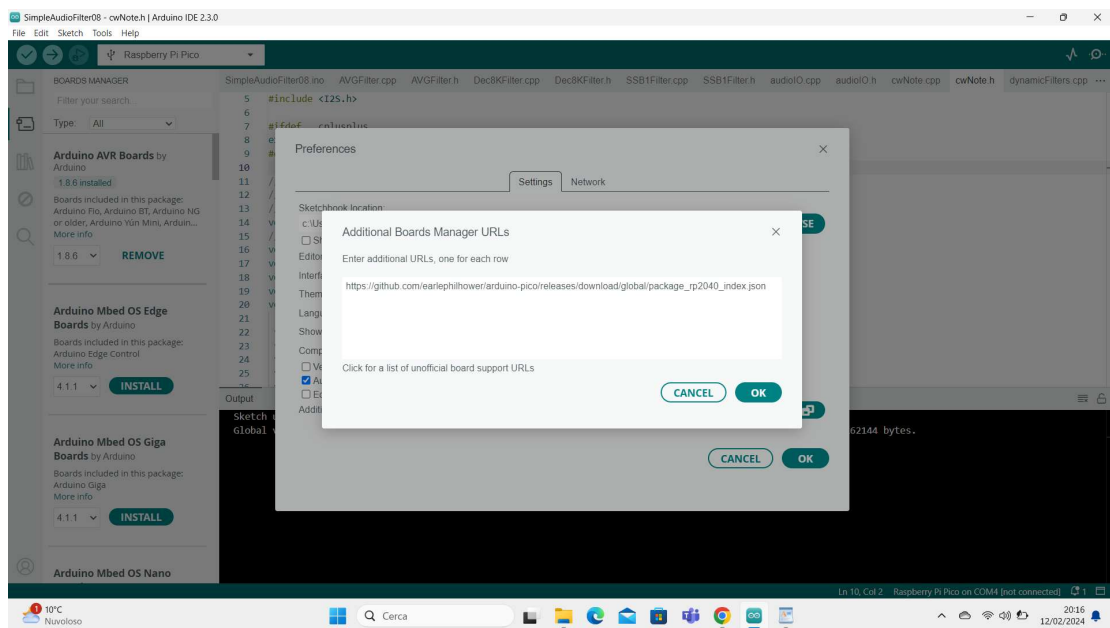

To download click on <> Code green button and select "Download"

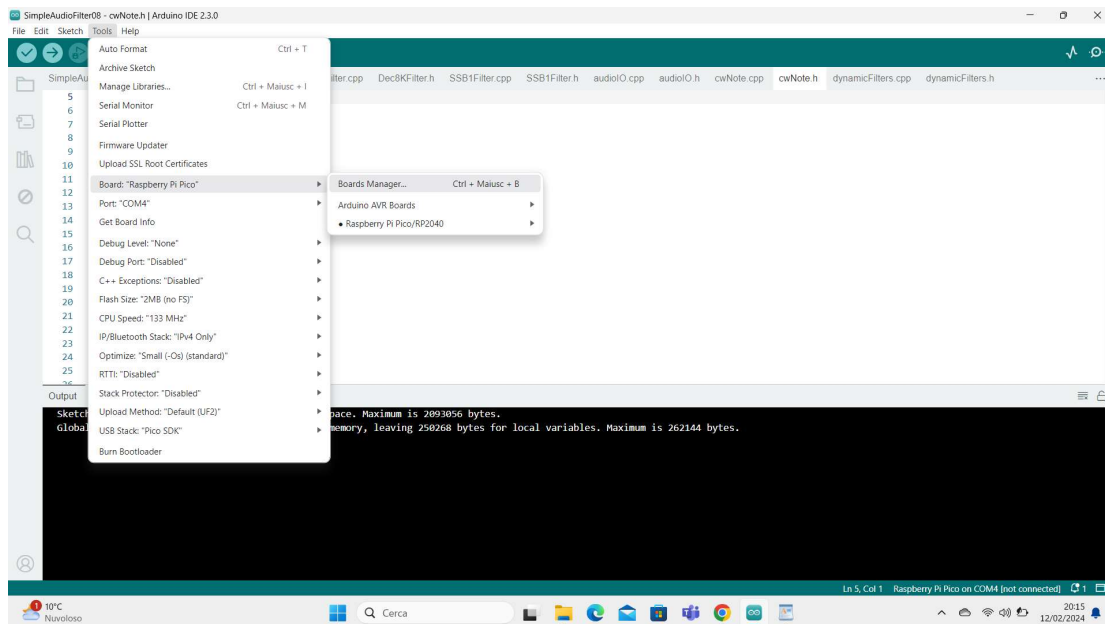

Save in a directory the zip and unzip all:

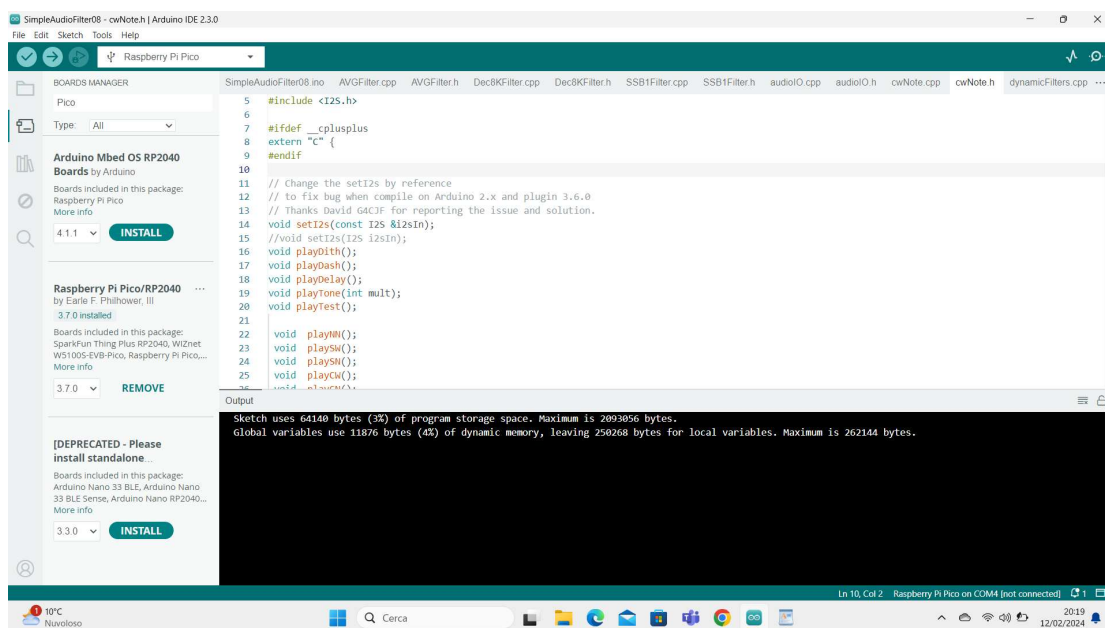

Install the earphilllover Arduino core pico, first add the additional source plugin frm preferences:

Next open the BoardManager:

and type the word: Pico

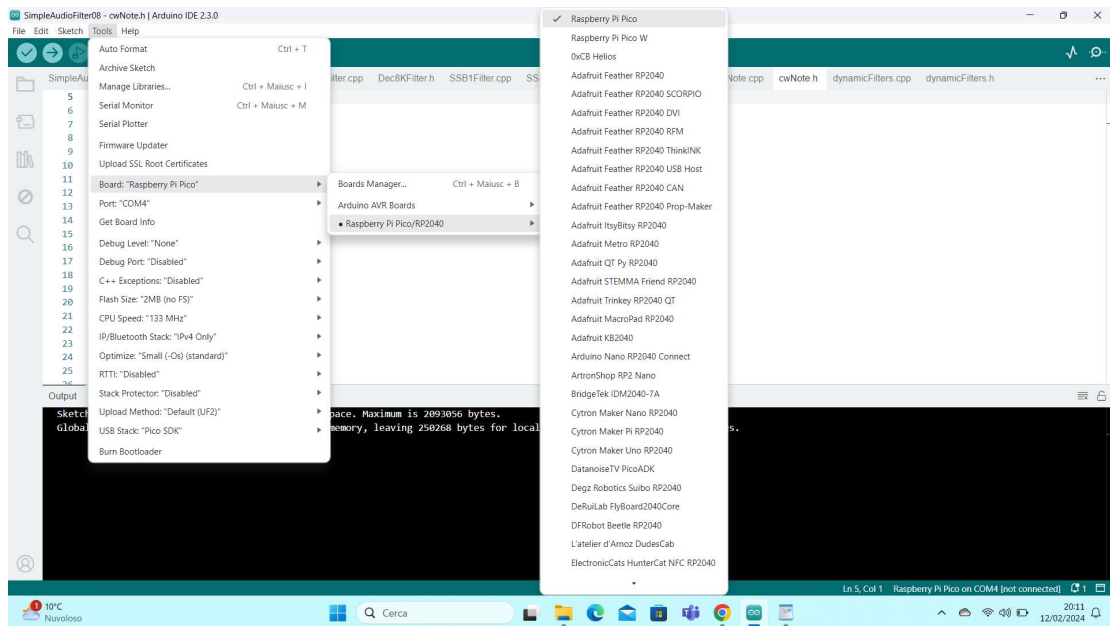

then select and install the plugin: "RaspBerry Pico..." by Earl Phillower ...

Now your IDE is ready to compile the source.

Open the Project: "SimpleAudioFilter08"

Make sure to select the right Board version:

And Compile.
